

Amendments to the Claims:

Listing of the Claims:

1-16. (Cancelled).

17. (Withdrawn) A computerized method of assisting the teardown of a product, comprising: generating a list of possible part identifier information for said product;

selecting from said list part identifier information corresponding to a part removed from said product; and

adding said part identifier information to an as-received database.

18. (Withdrawn) The method of claim 17, wherein said information includes a part number.

19. (Withdrawn) The method of claim 18, wherein said information also includes a serial number.

20. (Withdrawn) The method of claim 17, wherein said product is a gas turbine engine.

21. (Withdrawn) A computer system, comprising:

means for generating a list of possible part identifier information for said product;

means for receiving part identifier information corresponding to a part removed from said product; and

means for processing said part identifier information to include said part identifier information in an as-received database.

22. (Currently amended) A gas turbine engine part, comprising:

a paper tag comprising at least one part identifier information affixed to a gas turbine engine part having undergone a maintenance operation, wherein said tag corresponds to an electronic record and is a substitute for a plurality of paperwork pertaining to said maintenance operation,

wherein said at least one part identifier information comprises a part information section, a customer information section, a status section, a bar code section and a routing information section.

23. (Cancelled).

24. (Original) The gas turbine engine part of claim 23, wherein said status section comprises a disposition of said part according to said electronic record.

25. (Original) The gas turbine engine part of claim 23, wherein said bar code section comprises a unique identifier of said part assigned to said electronic record.

26. (Original) The gas turbine engine part of claim 23, wherein said routing information section comprises a maintenance operation history of said part through a maintenance facility.

27. (Original) The gas turbine engine part of claim 22, wherein said maintenance operation is a maintenance, repair or overhaul of said part.
